EDUCATION

● **Visvesvaraya Technological University, belagavi.**

B.E from KBN College of Engineering, Kalaburagi, Karnataka in 2022.   -

- Branch :-E&I
6.78GPA

● **P.U.C from SNS PU College of Kalaburagi Karnataka**

-

- Percentage:-52%

● **S.S.L.C from Government High School vajjal Karnataka**

-

- Percentage:-77.5%

ACTIVITIES

● **PROJECT**

Our main aim to obtain the medical information such as patient heart beat.   -

Why i am chose this project because Body temperature, ecg signal in rural area where people will not having proper medical facilities.

● **INTERNSHIP**

ELECTROSTATIC AIR CLEANER   -

Electrostatic air cleaners (sometimes known as electrostatic precipitators) are highly efficient filtration devices that use electrostatic attraction to remove fine particulate matter such as dust and cigarette smoke from the air. Electrostatic air cleaners ionize (or electrically charge) particles as incoming air is drawn over an electronic cell. The charged particles are then attracted to and trapped by a series of flat collector plates that are oppositely charged, with the particles literally "sticking" to the collection plates until they are manually removed.
